

Mauritius Meteorological Services

Mean Rainfall for 01-30 April 2018

Mauritius

Well above normal rainfall was recorded during April 2018¹. The month was marked with widespread rainfall associated with instability zones and these were occasionally moderate to locally heavy. Beside the Central Plateau and the East, it was particularly wet to the Southwest. Rainfall in excess of 250 mm was recorded in some localities to the Southwest and over 425 mm over the Central Plateau.

Outer Islands

		Amount (mm)		
	Stations	Actual Mean Rainfall	LTM Rainfall	% of LTM
Rodrigues	Pointe Canon	317	138	229
	Plaine Corail	337	116	290
	Citronelle	388	176	221
	Agalega	258	159	163
	St Brandon	159	110	144

Rainfall analysis is based on 23 Stations over Mauritius.

Rodrigues had well above normal rainfall. The total amount over the Island for this month was twice the Long Term Mean for April.

Similarly, at Agalega and St Brandon above normal rainfall was recorded.
