

Mean Rainfall for 16-30 September 2018

Mauritius

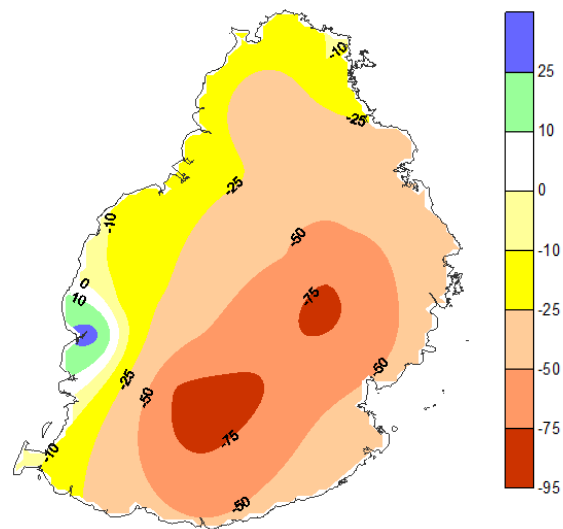

The second fortnight of September 2018 received an average of 11 mm of rainfall over the island. This represented 22 % of the long term mean for this period. Deficient rainfall of more than 50 mm was observed over the Central Plateau and to the South. Almost all regions over the island received below normal rainfall except in some localities to the West where it exceeded the normal by 25 mm.

Observed Rainfall (mm)

Rainfall Anomaly (mm)

Outer Islands

| | | Amount (mm) | | |
|-----------|---------------|----------------------|--------------|----------|
| | Stations | Actual Mean Rainfall | LTM Rainfall | % of LTM |
| Rodrigues | Pointe Canon | 7 | 26 | 27 |
| | Plaine Corail | 2 | 30 | 7 |
| | Citronelle | 17 | 48 | 35 |
| | Agalega | 30 | 22 | 136 |
| | St Brandon | 31 | 15 | 207 |

Deficient rainfall was recorded over Rodrigues with about 23% of the fortnight mean.

Above normal rainfall was observed both at Agalega and St Brandon.
