

## Mean Rainfall for 16-31 January 2018

### Mauritius

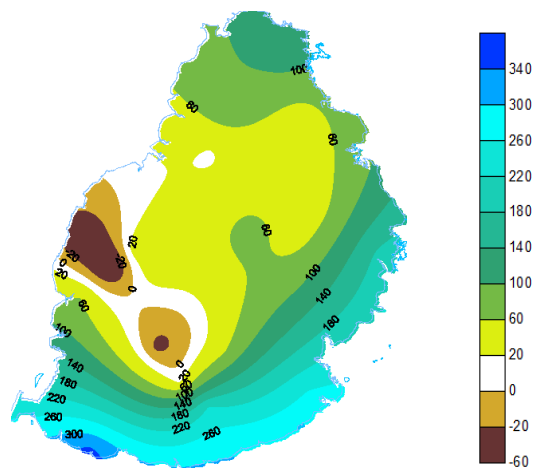

The second fortnight of January 2019 received above normal rainfall amounting to 221 mm, representing 148 % of the long term mean for the period. Almost all regions over the island received normal to above rainfall, reaching an excess of 300-350 mm in the South. However, to the West and over the Central Plateau, rainfall was locally deficient by up to 60 mm.

Observed Rainfall (mm)

Rainfall Anomaly (mm)

### Outer Islands

Stations	Amount (mm)
