## **Mauritius Meteorological Services**

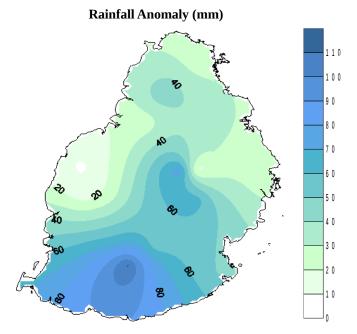

## Mean Rainfall for 1-15October2019

## **Mauritius**

The first fortnight of October 2019 received above normal rainfall amounting to 73mm, representing 221% of the long term mean for this period. Almost all regions of the island had above normal rainfall. An excess rainfall of more than 100mm was recorded in the region of Bois Cheri.

**Outer Islands** 

		Amount (mm)		
	Stations	Actual Mean Rainfall	LTM Rainfall	% of LTM
Rodrigues	<b>Pointe Canon</b>	20	21	95
	Plaine Corail	10	17	59
	Citronelle	31	46	67
Agalega		199	32	622
St Brandon		4	15	27

Rodrigues received below normal rainfall and it was much drier at St. Brandon for this period.

It was very wet at Agalega with well above normal rainfall representing more than 6 times of the long term mean for this first fortnight.
