

Mauritius Meteorological Services

Mean Rainfall for 16-31 July 2020

Mauritius

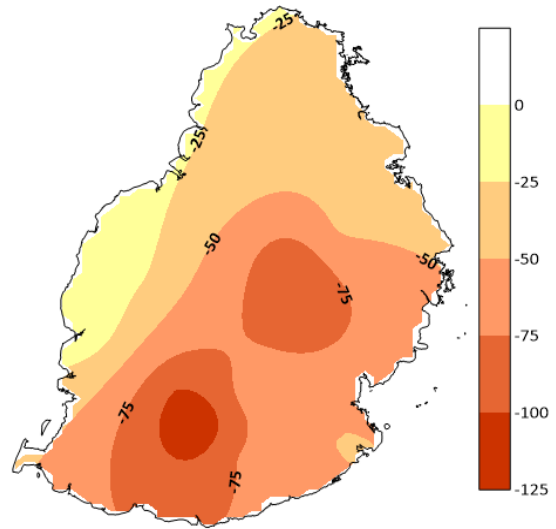

The second half of July 2020 was very dry with well below normal rainfall amounting to 16 mm, representing 25 % of the long-term mean for this period. The whole island received below normal rainfall. Rainfall was locally deficient by over 100mm in the regions of Arnaud and Bois Cheri.

Observed Rainfall (mm)

Rainfall Anomaly (mm)

Outer Islands

		Amount (mm)		
	Stations	Actual Mean Rainfall	LTM Rainfall	% of LTM
Rodrigues	Pointe Canon	9	46	20
	Plaine Corail	5	36	14
	Citronelle	16	69	23
	Agalega	272	46	591
	St Brandon	17	22	77

Rodrigues received well below normal rainfall whereas St. Brandon had slightly below normal rainfall for this second fortnight. On the other hand, it was very wet at Agalega with well above normal rainfall representing more than 5 times its long term mean for this period.
