

Mauritius Meteorological Services

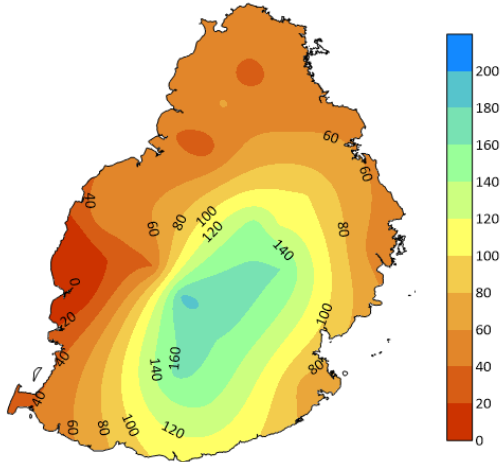

Mean Rainfall for 16-30 April 2022

Mauritius

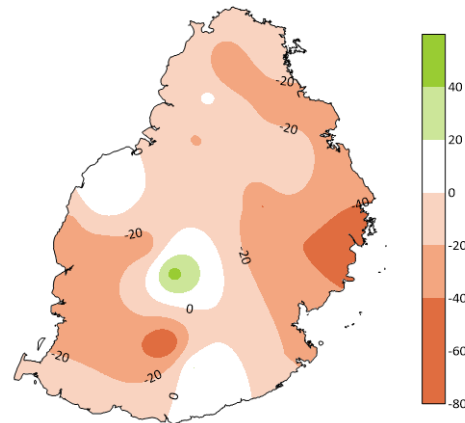

The second fortnight of April 2022 received slightly below normal rainfall, amounting to 82 mm and representing 86 % of the long-term mean. Rainfall was mostly deficient over the whole island and locally in places like Bois Cheri and Beau Champ, this deficiency was about 45-65 mm. However, in some places such as Mon Bois, Briatania and La Chaumiere, rainfall was in excess by 20-50 mm.

Observed Rainfall (mm)

Rainfall Anomaly (mm)

Outer Islands
