Mauritius Meteorological Services

Mean Rainfall for 16-31 July 2022

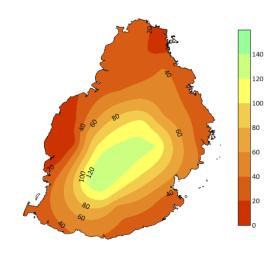

Mauritius

The second fortnight of July 2022 recorded slightly below normal rainfall, amounting to 57 mm, representing 81 % of the long-term mean. Rainfall was deficient almost over the whole island, especially in region of Bois Cherie, Sans Souci and Grande Providence, where the deficiency was by 40-45 mm. However, in the region of Quatre Bornes and Vacoas, rainfall was locally in excess by 15-25 mm.
