Temperature Forecast for Oct-Nov-Dec (OND) 2026

Neutral IOD is expected in Oct-Nov-Dec (2026). **SIOD** is in a neutral phase. Over the Equatorial Pacific Ocean, the El-Nino event is strengthening gradually. **Positive pressure anomalies** are expected over the La Reunion – Mauritius – Rodrigues. However, negative pressure anomalies are expected further South of the region (Fig b).

Based on the prevailing large-scale and regional atmospheric conditions, **the consensus rainfall forecast for OND-2026 has been revised to Near Normal (92% of LTM)** as follows:

Standardized Precipitation Index (SPI) Monitoring in Mauritius

Aim: To apply the SPI, as recommended by the World Meteorological Organization, in Mauritius to monitor rainfall deficits resulting into prolonged dry spell events.

Current Status: Negative SPI value has been observed in **JAS-26** with a 3-month average value of **-0.90**.

SPI Forecast: Near Normal conditions are expected in **ASO-26**, and **OND-26**, with SPI-3 values of **-0.88** and **-0.83** respectively. However moderately dry conditions are expected in **SON-26** with a SPI value of **-1.27** (Fig b).
